

Acer Aspire V3-551-8887 Back Panel Replacement

The back panel gives access to many necessary components of the laptop.

Written By: Jacob Lesinski

INTRODUCTION

Removing the back panel gives access to most everything else in the laptop.

TOOLS:

- [Phillips #1 Screwdriver](#) (1)
 - [Spudger](#) (1)
 - [64 Bit Driver Kit](#) (1)
-

Step 1 — Back Panel

- Locate and remove the two 5.3 mm Phillips #1 screws holding the back panel in place.

Step 2

- Use a spudger to pry the panel up from the laptop case and remove it.
- The laptop should now be open with the RAM and wifi chip now accessible.

To reassemble your device, follow these instructions in reverse order.
